

Neurorehabilitation, FACETS, research news and more!

[View this email in a browser](#)

Welcome to the Spring edition, dedicated to bringing you the latest insights and research in the world of MS.

## **Exploring Neurorehabilitation: Glasgow Online Networking**

**Friday, 30 May | 9.20 AM - 12.30 PM**

This online event will be an opportunity to meet colleagues in Neuro-Rehabilitation, review the current situation in Glasgow and the

surrounding area, share good practice and be part of a roundtable discussion about services in the future.

[Register for the event now →](#)

## **Webinar: Mental Health & Neurological Conditions**

**Thursday, 12 June | 7 PM**

Enhance your understanding of mental health support and neuropsychological rehabilitation services. Join Lead Clinical Psychologists Mark Griffiths and Perry Moore along with Lead Clinical Neuropsychologist Amanda Mobley and Lead Counsellor Voluntary Sector Glesni Roberts at the webinar. Learn to build a robust clinical business case, explore commissioning routes, and review real-world case studies.

## **Exploring Access to Community Rehabilitation**

At the webinar in March, Shona Pryde and Owen Williams shared their award-winning research on the challenges faced by people with progressive neurological conditions in Northern Ireland. They described what good access looks like and discussed priorities for local service improvements.

## Research News and Updates

### Does Eating Fish Reduce MS Progression?

Swedish research suggests a diet rich in lean and oily fish may reduce disability progression in MS. What does this mean for those with MS? We dive into the findings behind the headlines.

**>> Find out more about the research study**

### ChariotMS Trial Reaches Recruitment Milestone

The ChariotMS trial for advanced progressive MS has enrolled its 200th participant, meeting its goal. Aiming to deliver the first disease-modifying therapy for wheelchair users with MS, results are expected in 2027.
